

What Makes Good UI and UX?

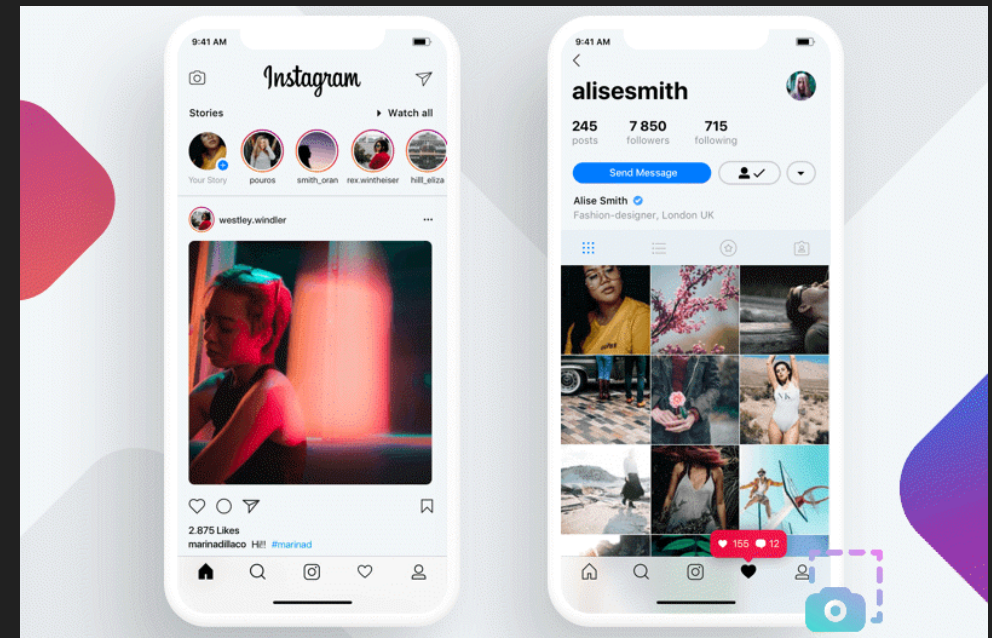

A look at intuitive interfaces and user-centered experiences.

- Examples: Spotify, Amazon, Instagram, Omnivox (Vanier College), Facebook

What is Good UI?

UI (User Interface) focuses on how things look and work on the surface.

- Intuitive, familiar, responsive, consistent & clear, minimalist
- Example: Instagram — clean design that anyone can pick up instantly

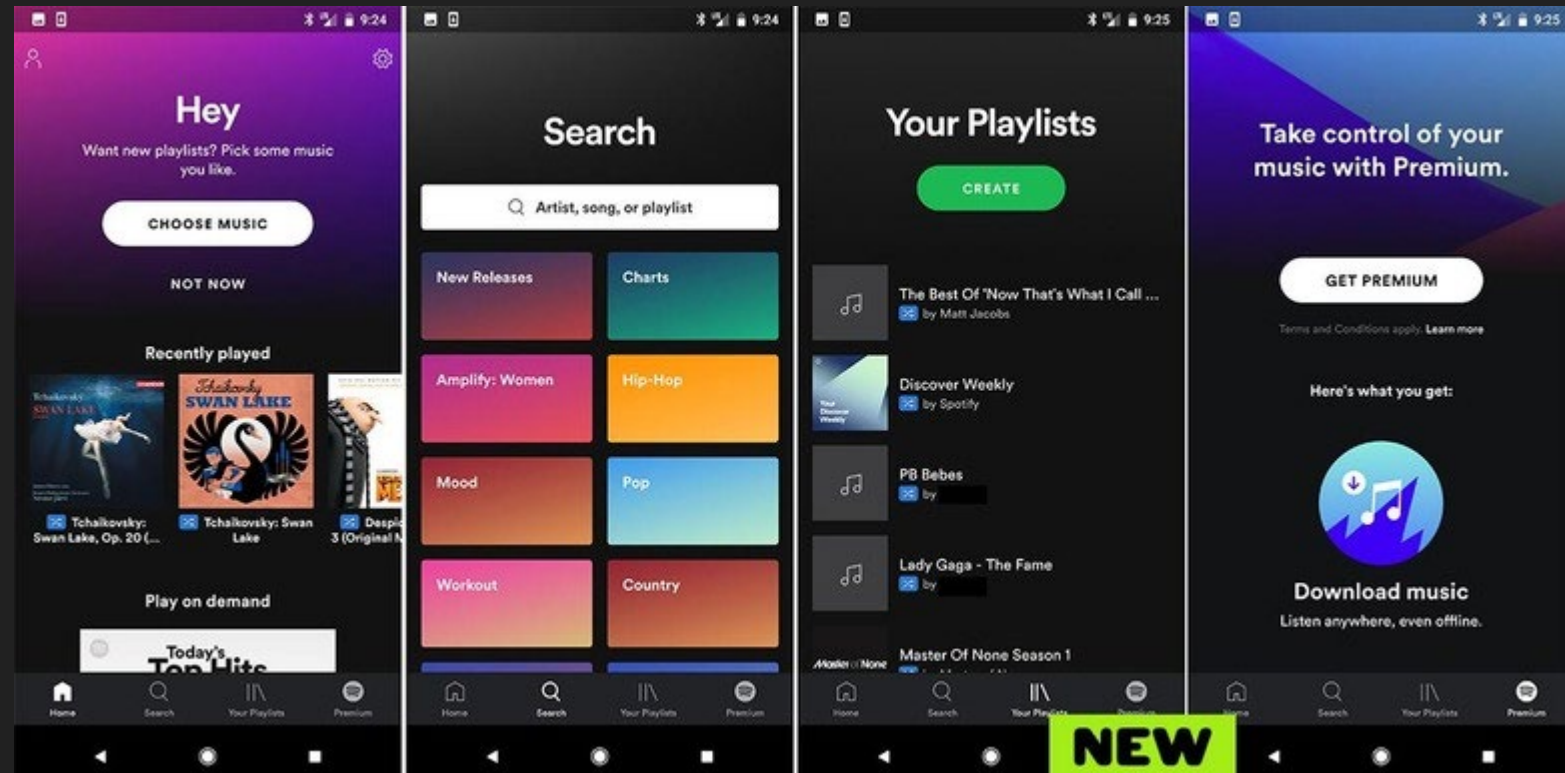

Intuitive UI

Great UI design feels natural — users don't need instructions.

Example: Spotify's music player — play, pause, skip are obvious at first glance.

Impact: New users stream music within seconds, no confusion.

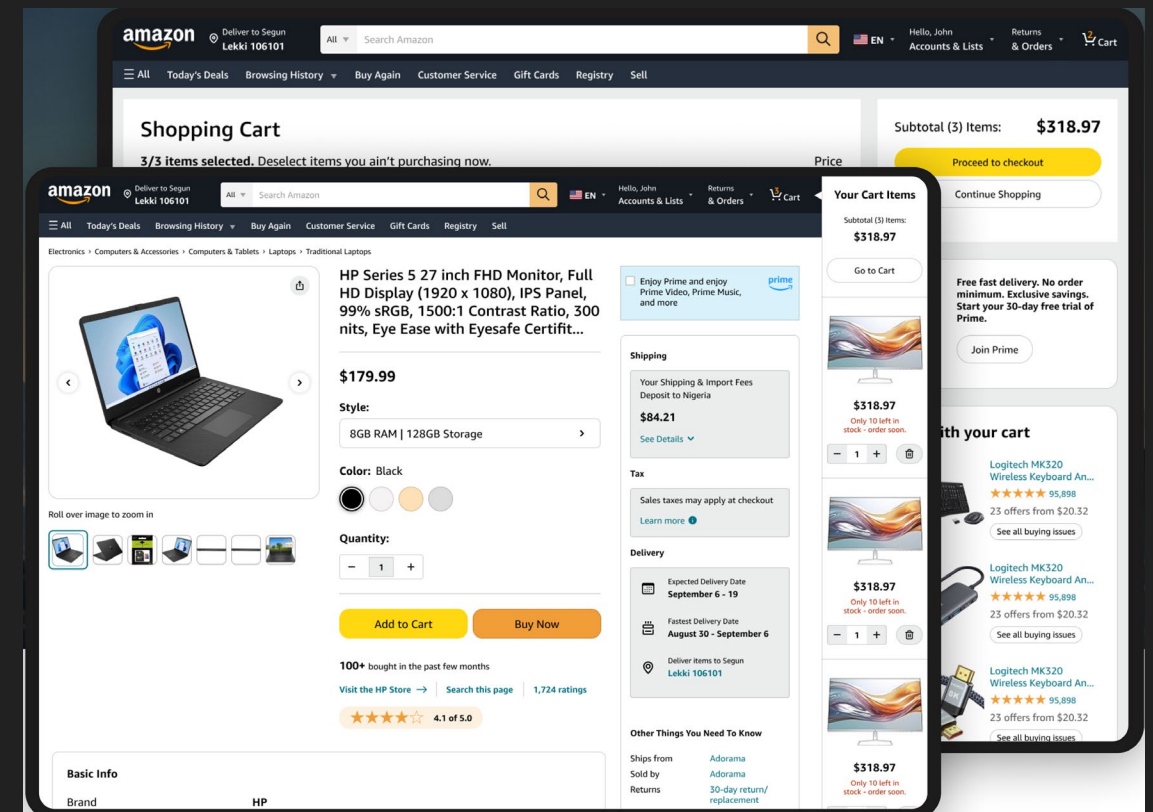

Familiar UI

Good UI uses patterns users already know.

Example: Amazon's shopping cart — instantly recognizable icon and layout.

Impact: Users can checkout faster without learning anything new.

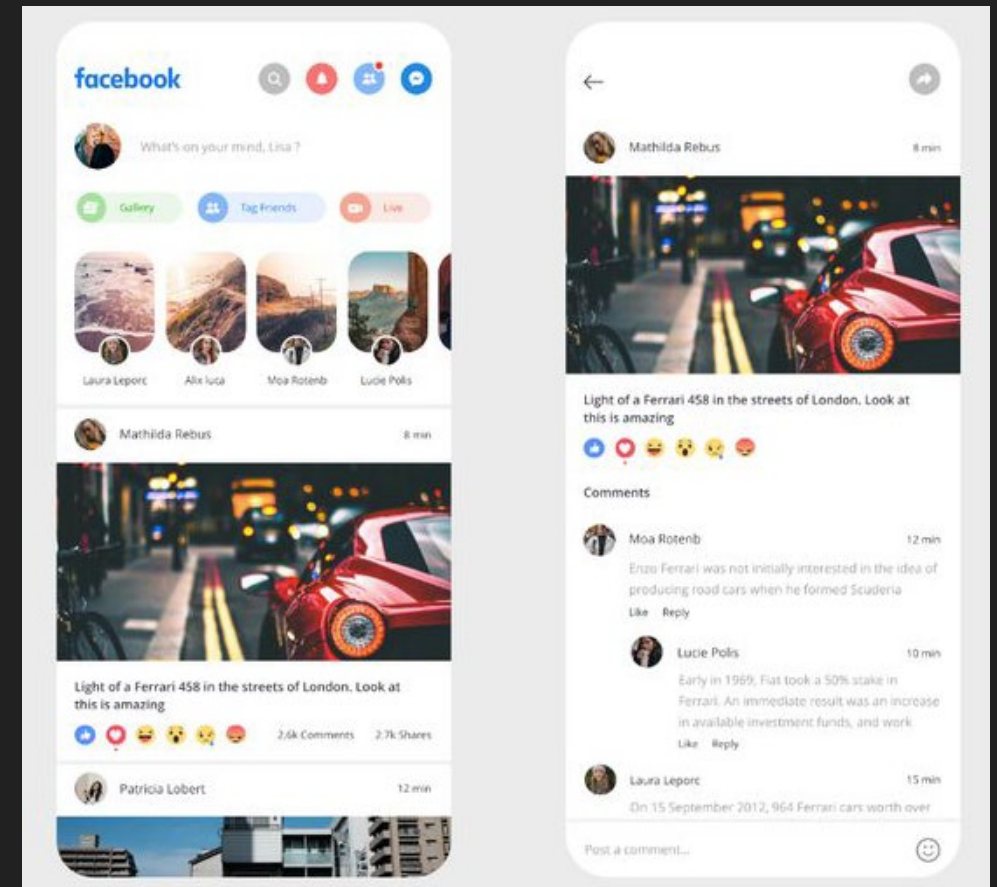

Responsive UI

Interfaces must adapt to any device size.

Example: Facebook's mobile app — content looks good on phones, tablets, and desktops.

Impact: Consistent experience no matter where users log in.

Consistent & Clear UI

Consistency makes navigation fast; clarity builds trust.

Example: Omnivox schedule — clear menu, predictable flow.

Impact: Students find schedules and grades with less stress – ha!! Do you??

Minimalist UI

Minimalism means doing more with less — typography, spacing, and clear hierarchy.

Example: Google Search — a single box that does everything.

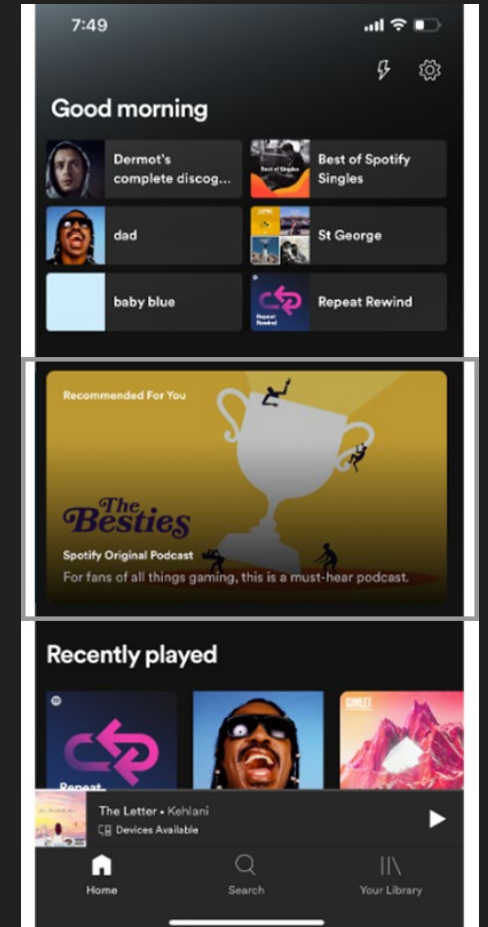

Impact: No distractions, users go straight to the goal.

What is Good UX?

UX (User Experience) focuses on how products feel and solve problems.

- Usable, desirable, findable, accessible, useful, credible
- Example: Spotify recommendations — makes music discovery delightful

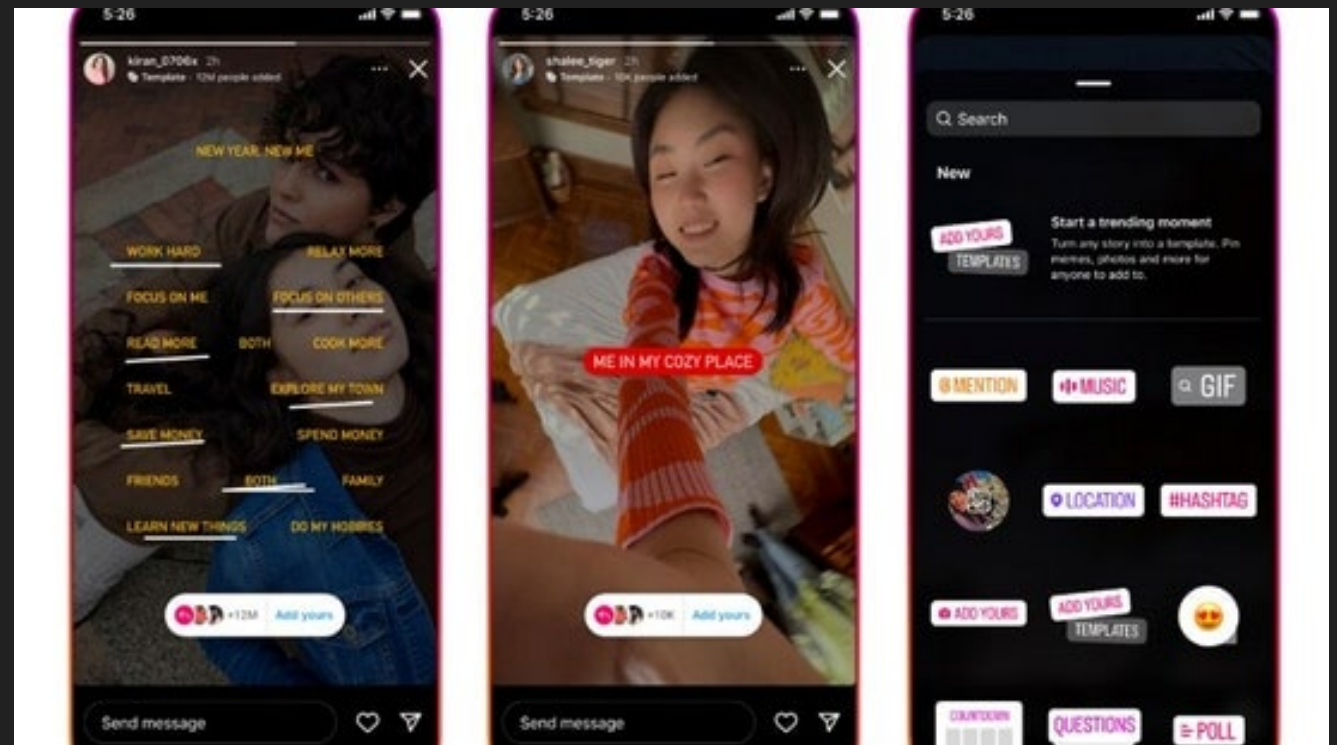

Usable UX

Usability means easy navigation and customization.

Example: Instagram Stories — swipe gestures are easy to learn and remember.

Impact: Even first-time users can create posts instantly.

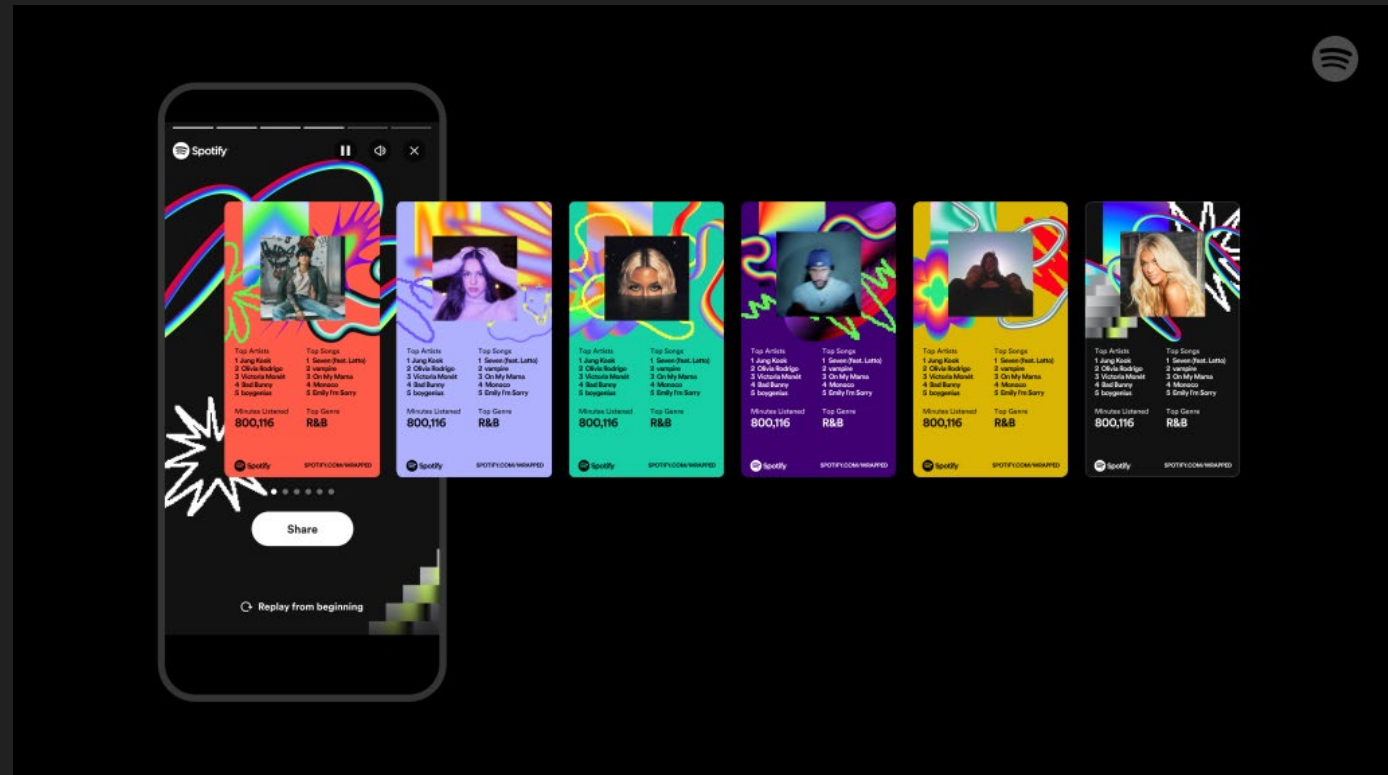

Desirable UX

Good UX makes people feel good about the brand.

Example: Spotify Wrapped — users look forward to personalized playlists every year.

Impact: Builds loyalty and positive emotions toward the product.

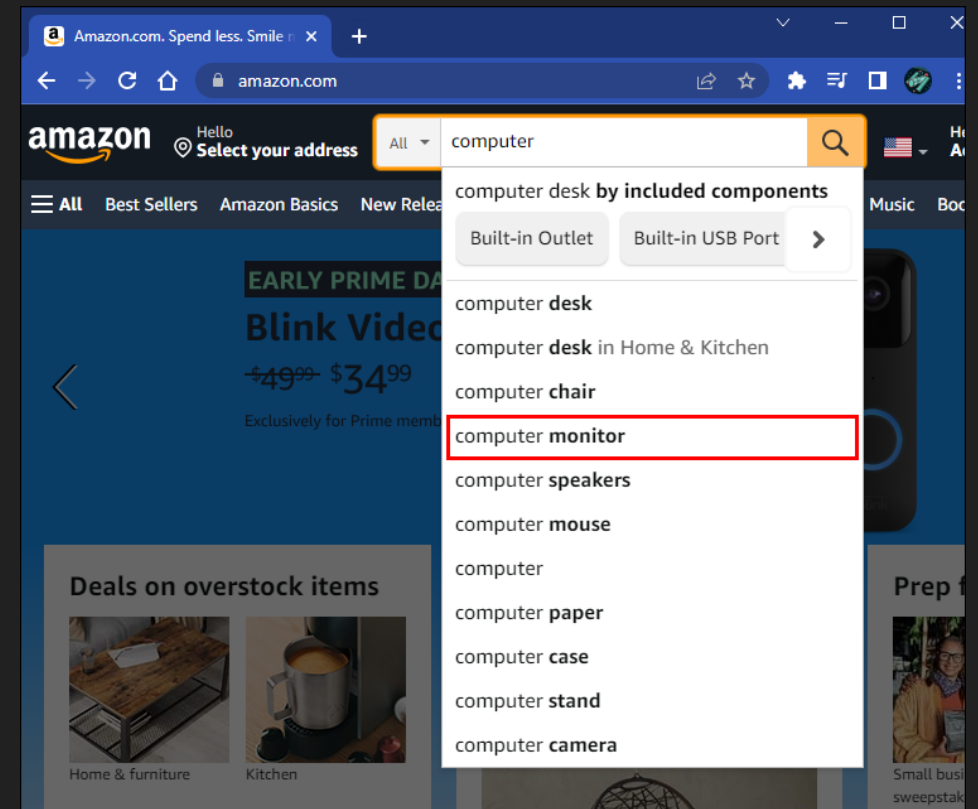

Findable UX

Content should be easy to locate on and off the site.

Example: Amazon search and filters — products appear quickly with relevant options.

Impact: Shoppers don't waste time, increasing conversions.

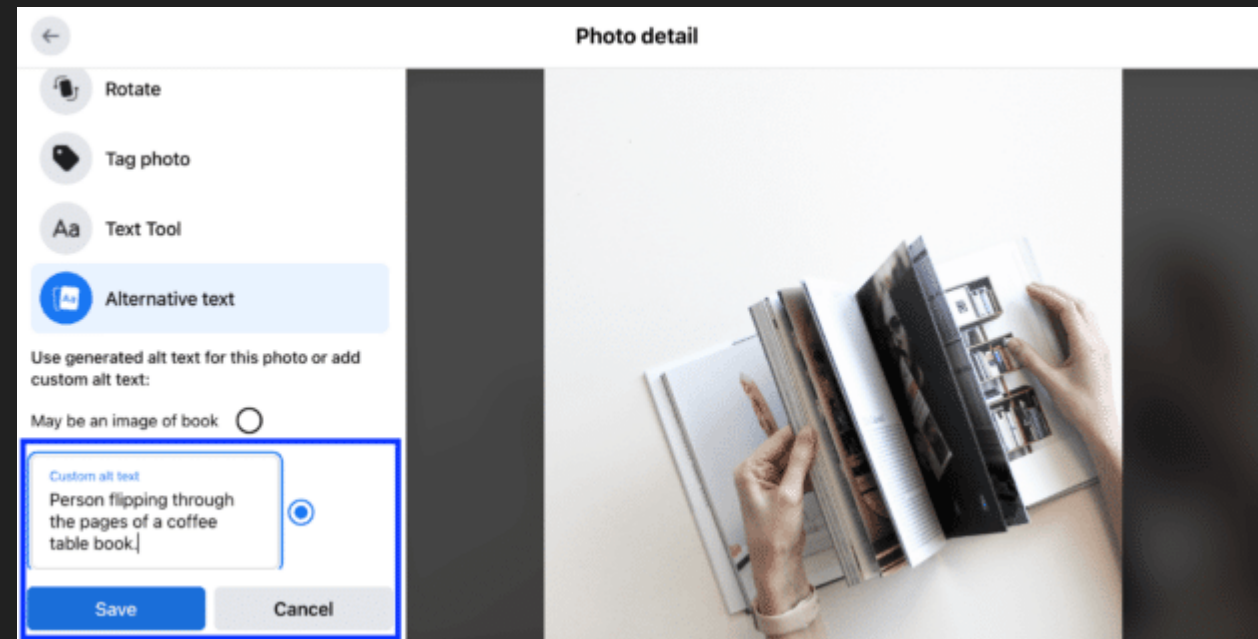

Accessible UX

Design for everyone, including users with disabilities.

Example: Facebook captions and alt text for images.

Impact: More people can engage with content fully.

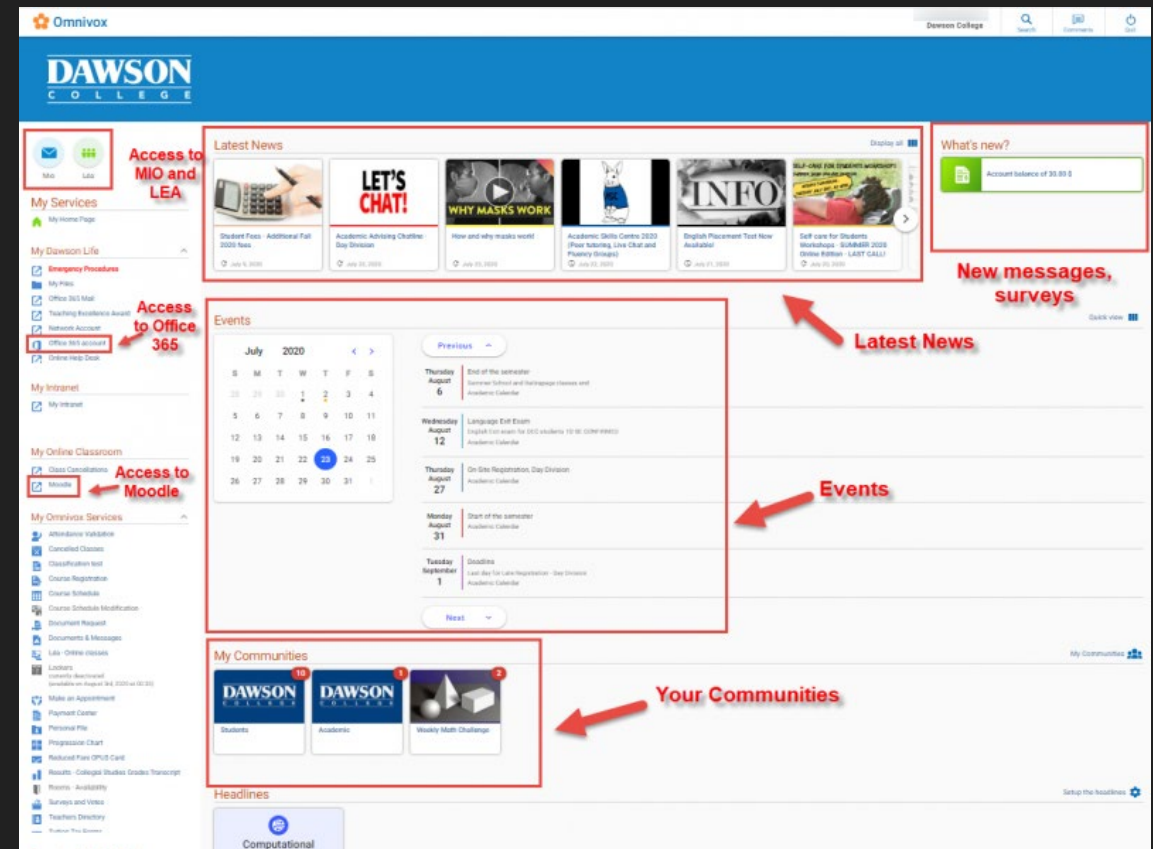

Useful UX

Content and features should meet real user needs.

Example: Omnivox notifications — updates students immediately on class changes.

Impact: Keeps users informed and satisfied.

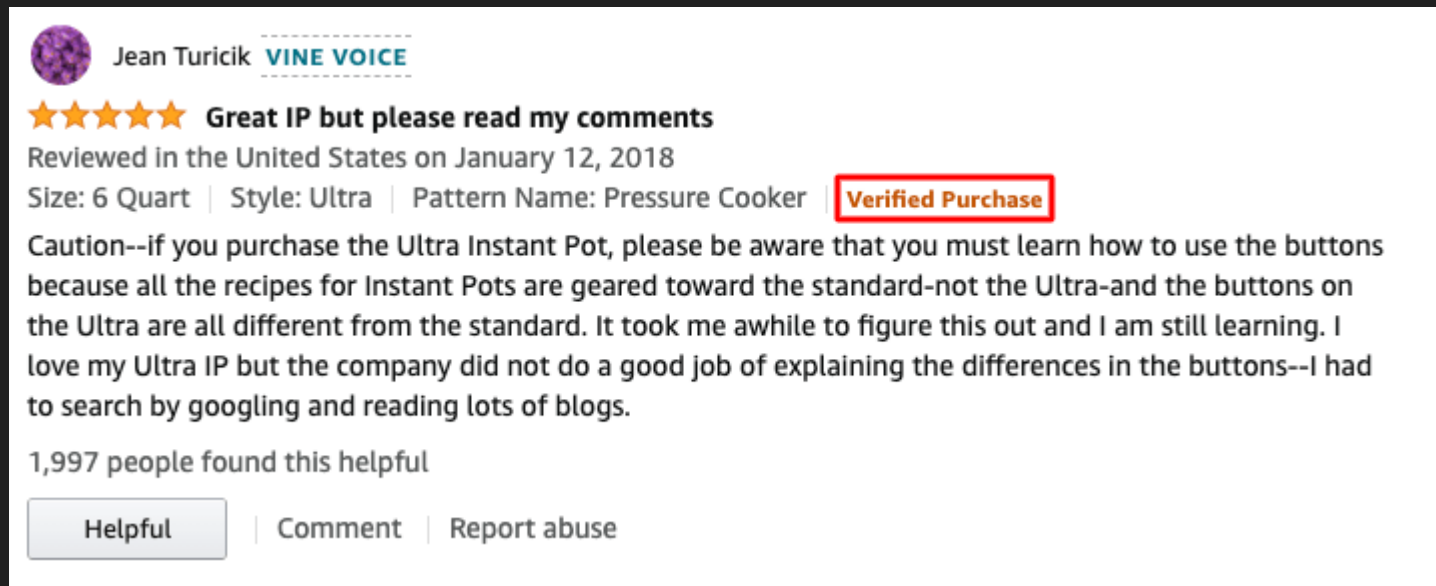

Credible UX

People must trust what they see.

Example: Amazon ratings and verified reviews — build credibility instantly.

Impact: Users feel confident buying online.

A screenshot of an Amazon product review for a pressure cooker. The reviewer is Jean Turicik, a 'VINE VOICE'. The review is a 5-star rating with the title 'Great IP but please read my comments'. It includes a date, product specifications, a 'Verified Purchase' badge, a detailed cautionary comment about the Ultra Instant Pot's controls, and a helpful count. At the bottom are buttons for 'Helpful', 'Comment', and 'Report abuse'.

 Jean Turicik **VINE VOICE**

★★★★★ **Great IP but please read my comments**

Reviewed in the United States on January 12, 2018

Size: 6 Quart | Style: Ultra | Pattern Name: Pressure Cooker | **Verified Purchase**

Caution--if you purchase the Ultra Instant Pot, please be aware that you must learn how to use the buttons because all the recipes for Instant Pots are geared toward the standard-not the Ultra-and the buttons on the Ultra are all different from the standard. It took me awhile to figure this out and I am still learning. I love my Ultra IP but the company did not do a good job of explaining the differences in the buttons--I had to search by googling and reading lots of blogs.

Group Work: UI/UX Analysis

Work in teams to analyze a website.

- Team A: Focus on UI (layout, visuals, interaction)
Websites: Apple, Ling's Cars (lingscars.com),
Stripe (stripe.com), Yale School of Art (art.yale.edu),
Dropbox, Amazon
Notion.so, Pacific Northwest X-Ray Inc. (pnwx.com)
Pitch.com, gatesnfences.com
- Team B: Focus on UX (flow, satisfaction, credibility)
Booking.com, Craigslist (using web.archive.org),
Gov.uk, Zara,
Spotify, Arngren.net
Duolingo, suzannecollinsbooks.com
Slack.com, pennyjuice.com

Present Your Findings

Share your analysis with the class:

- What worked well?
- What caused frustration?
- What can be improved?

Use screenshots to support your points.
