

COURSE DESCRIPTION

In Functional Documents students will use professional illustration, image editing and layout software to design effective multimedia documents.

COURSE DETAILS

PONDERATION: 1-3-2

DURATION: 60 hours (4 hours / week)

PREREQUISITES: GRAPHICS 1: ILLUSTRATION & PHOTO EDITING

REQUIRED MATERIALS: InDesign, Illustrator, Adobe Acrobat, Office365 Photoshop

INSTRUCTOR INFORMATION

INSTRUCTOR: Ashleigh Huza

OFFICE: M-106

EMAIL: huzaa@vaniercollege.qc.ca

AVAILABILITY:

Available for one-on-one meetings by appointment. I can be reached either by email, through Omnivox's MIO or by direct message via Microsoft Teams.

Expect response to messages within 24 hours.

TEACHING METHODS

All classes will be held synchronously, in-person in the scheduled classroom or lab during the scheduled course times unless otherwise determined by the teacher beforehand. All information regarding upcoming classes will be distributed to students via Omnivox's MIO messaging system.

Files and course relevant content will be distributed via Omnivox's LÉA.

All assignments, projects and exercises will be distributed and submitted through Omnivox's LÉA along with grades and feedback, when applicable.

All assignments and projects are done in-class, and completed outside of class hours.

COURSE AND COLLEGE POLICIES

Please refer to the following link for details on policies found below:

<https://www.vaniercollege.qc.ca/psi/course-level-policies/>

- Student Academic Complaints (see 7210-8)
- Cheating and Plagiarism (see 7210-31)
- Student Misconduct in the Classroom (7210-19)
- Code of Conduct, Religious Holy Day Absences (see IPESA, Section 2.2.6)
- Student Proficiency in the Language of Instruction (see 7210-33)
- Generative AI is permitted for specific activities. [See resources here.](#)

COURSE'S ROLE IN THE PROGRAM

Emphasis will be placed on recognizing and responding appropriately to one's target audience while applying design principles and elements. In this course students will learn to design functional forms (interactive and web) in both English and French, incorporating principles of design, and effective testing processes.

COURSE OBJECTIVES & LEARNING ACTIVITIES

Students will demonstrate basic competency with current professional illustration, image editing and layout software as well as preparing digital image files for standard commercial applications.

Through active participation in class, students will have the opportunity to:

- Plan, execute, and refine creative concepts and ideas through effective visual design.
- Apply the principles of visual hierarchy in digital and print layouts.
- Demonstrate an understanding of the relationship between form and function and their significance in effective user-centered visual communication..
- Create and prepare simple, interactive, multi-page print and digital documents for professional applications.

Students may be assessed using a combination of, but not limited to, the following:

- Individual and collaborative exercises.
- Individual and group projects designed to challenge and evaluate learning outcomes.

LIA:

- This assessment is intended to evaluate students' achievement of the course-level learning outcome through the realization of a complex and authentic task.
- The LIA for this course will be comprised of comprehensive training manual which is a culmination of all key concepts learned in the class. The evaluation criteria will be provided at the exam and topics to review will be provided by the teacher prior to the exam. Theoretical tests addressing the concepts discussed in class.
